PROFILE

Full-stack developer with 9+ years of experience building web and mobile products for clients in the US, Canada, Chile and Mexico. I work across Ruby on Rails, React/Next.js, React Native and WordPress, and I take products from idea to production on my own: I designed and shipped **cuicui**, a real-time multiplayer 3D social game, and a mobile game on the App Store. I'm used to fully remote teams and use AI-assisted tools (Claude, Codex, Copilot) every day to deliver faster without lowering code quality.

WORK EXPERIENCE

Inventiva 2026

WordPress Developer

- Build and maintain client websites on WordPress: custom themes, page templates and plugin customization in PHP.
- Improve site performance, responsiveness and SEO, and support content teams with updates and fixes.

Modyo Sep 2024

Full-Stack Ruby on Rails Developer (Contractor)

- Build features and platform improvements for DialogEDU, an education platform on Ruby on Rails with Stimulus and React on the frontend.
- Own new functionality, bug fixes and enhancements across the stack, working remotely with the Chilean engineering team.

Mind (micheldada / arkusnexus) 2021 – Sep 2024

Ruby on Rails Developer

- **Breakthrough Broker:** built features for a real estate marketing platform where agents create and manage marketing materials.
- **Notary:** web app where users upload payment proofs that are verified with OCR; cut document processing time by 40%.
- **Tigo Money:** improved backend services for transfers and payments in five LATAM countries and shipped a QR payment feature.
- **Fixle:** built a REST API from scratch with passwordless auth, an admin panel and web scraping of appliance data.

Hipergas 2019 – 2021

Software Developer

- **Invoice Portal:** React frontend and Rails API, connected by webhooks to the Business Central ERP (AL extensions).
- **Gas Sales App:** React Native app and Rails API to take customer orders and dispatch them to the call center.

Delphi Technologies 2017 – 2019

IT Coordinator / Developer

- Built desktop and web apps for production, including inventory systems in C#, MSSQL and DevExpress.
- Managed the IT department, vendors and helpdesk support.

PERSONAL & FREELANCE PROJECTS

- **cuicui** NEW – Multiplayer 3D social game on real maps of Mexican cities (Next.js, PWA, Android/iOS). Avatars, real-time proximity text and voice chat, 20+ mini-games with leaderboards, live multiplayer games, an in-game economy with jobs, decoratable homes, travel between cities and local business discovery. Built and shipped solo. cuicui.com.mx
- **Teregalo** – Gift exchange platform (Next.js, Firebase, TypeScript) with automatic drawing, WhatsApp invites, wish lists and i18n. teregalo.online
- **Juárez Survivor** – Mobile arcade game (React Native, Expo) with 5 mini-games inspired by Ciudad Juárez. On the App Store.

- **IQKitchen** – HACCP food safety app (React Native, Expo); improved process efficiency by 60%.
- **PideDirecto** – Food delivery web app (React); raised order completion by 15%.
- **Calistenia Juárez** – Directory of public calisthenics parks in Ciudad Juárez. calisteniajrz.netlify.app
